

Annual water quality report

This report describes the drinking water supplied to the town during the year.

How the samples were taken

Samples were taken at the works and at six points in the network.

Figure 1. The treatment works from the east bank

January	24	24
February	22	21
March	26	26

Fourth-quarter results were added later and nobody tagged them.

Two February samples exceeded the turbidity limit; both passed on re-test.
